

Manual for End-of-Life product policy handling

Version: 31.03.2024

Intro

Dear Customer,

we are grateful that you have decided to use our wooden products. We believe they have served you well.

In case, our products cannot be used for their original purpose anymore, we bring you some tips and guidelines on how to reuse them with aim of **reducing environmental impact and carbon footprint as much as possible.**

TIP 1: Energy utilization

- Our wooden pallets and boxes are **suitable for energy utilization**.
- It is also suitable for production of ecological fuel like **pellets and briquettes**. We produce them, too.
- Biomass is also considered as **renewable energy source**.
- **STROJBAL offers its customers FREE take back of damaged wooden products**. They will be used for production of heat or electricity.
- Wood waste can be also handed **to employees for individual energy utilization**. **But be careful due to legal obligations (obtaining consent for transfer of waste suitable for household use – according to Waste law)**.

TIP 2: Repair

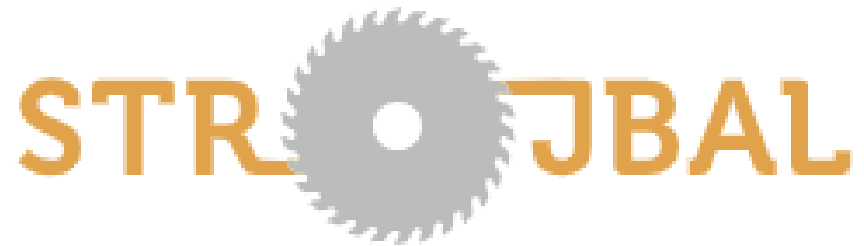

- Wood products, including pallets, are very easy **to repair**.
-
- Carry out regular visual **inspection** of pallets and packaging.
 - Separate damaged products and according to extent of damage identify those which **can be repaired without affecting quality and safety**.
 - Contact a company representative of STROJBAL s.r.o. **for taking back and repairment of products**.
 - It is also possible to arrange delivery of selected spare parts for **pallets self-repair**.

TIP 3: New purpose

- It is possible to use selected wooden products after their end of life for completely different purpose.
- STROJBAL offers products made of wooden pallets or residual wood in a company store. You can get inspired here.
- For more inspiration, follow our **Facebook page „Dreváreň Strojbal“**

Contacts
